DESCRIPTION:

We have implemented a connect 4 game using c programming language

FEATURES:

Our connect four game can be played in two modes multipliers and single player

It has a menu of four sections (new game , load game ,top players , exit)

DESIGN OVERVIEW:

Menu of game is square like and with a lightbar to make it to deal with

Board of game is well designed and enhanced with colours when playing

Top players can be loaded in game after end playing or from menu . It is sorted according to scores of players.

ASSUMPTIONS:

Game size cannot be more than (50\*50)

Tabs and spaces will change name of user (ahmed!= ahmed)

If the two players get same score , no one of them will be taken in file

### DATA STRUCTURES:

2 dimensional array to save moves and print board using it

1 dimensional array to check completeness of columns

Struct for time

Struct for top score parameters

Struct for game configuration

### IMPORTANT FUNCTIONS OF GAME:

**Printscores** :will print X top scores where x is a parameter taken in

Start of game

**Push1,push2,pop1\_value,pop2\_value ...**: will deal with stack of undo/redo

**Horizontal check**: will count score in rows

**Vertical check** : will count score in columns

**Diagonal check 135**:to count score in one diagonal

**Diagonal check 45** :to count score In the diagonal

**Check score**:will display total scores of each player

**Play \_display\_with computer**: function to manage playing of computer

It calls many inside it like score functions and undo/redo functions

**Init\_array**: will initialize array of playing with stand values

**Printboard**: to display board of game after each move

**Play\_display** :same as play\_display with compuer but it manages multiplayer mode

**Choices/draw\_box\_main**: help in printing menu and game array in board like way.

**Save functions**: to save game in files

**Load functions**: to play saved games

## (USER MANUAL )

Open game and a main menu will appear

Choose one of menu components(new game , load game, top score,exit)

If you choose a new game a sub menu will appear and you can choose a mode (1 player,2 players)

Game parameters will be read from configuration file in start of game

Choose a column to put your move

Score will be updated after each new connect 4 formation .

Winner player name will be taken in top score file and his rank (according to his score in game).

Top players will be displayed in end of game

You can save and load game

You can display top scores from main menu

You can undo a move in game by pressing u and redo by pressing r

sample runs:

COMPUTER'S TURN

Player 1 score: 0

Player 2 score: 0

time taken in game:

seconds : 7

Player 1 total moves: 3

Player 2 total moves: 3

Player1, Choose column from 1 to 4 (u for undo, r for redo, s for save, x for main menu):

Player 1 total moves: 3

Player 2 total moves: 3

Player1, Choose column from 1 to 4 (u for undo, r for redo, s for save, x for main menu):

u

Player 1 score: 0

Player 2 score: 0

time taken in game:

seconds : 33

Player 1 total moves: 4

Player 2 total moves: 4

Player1, Choose column from 1 to 4 (u for undo, r for redo, s for save, x for main menu):

5

3

Player 2 score: 0

```
minutes : 1          seconds : 14
```

Player 2 total moves: 5
